Agriculture School in Zambia

Africa, the "chronic starving continent" is rich in natural resources. Soil, water and Zambia's climate would be good enough to provide food to all of Southern Africa. Yet, many millions of people live in poverty and are barely able to feed themselves and their families. 40 years ago, a missionary agricultural school with farm, poultry and cattle breeding was founded by a German couple, with the goal - HELP TO SELF-HELP. Students and farmers learn how to optimally work their land and sell the produce to supply their families. We want to continue to expand this work. We are seeking christian professionals who will help this work continue. More information and applications can be found at:

www.goodhopezambia.net

Your Profile:

- Agricultural engineer or equivalent education with practical work experience
- First-hand experience in a managerial function and in organizational development
- Good command of English and a willingness to learn new languages
- Intercultural and social skills
- Good dialectical skills
- Experience with livestock (poultry and cattle) is an advantage
- Commercial and theological basic knowledge are beneficial

Your

Assignment

- Development of curricula and training of lecturers
- Education and support of students in the basics of agricultural and horticultural work as well as the marketing of agricultural products.
- Selective counselling and support for the graduates of the course in the implementation of the learned skills in the domestic, rural context
- Guidance of small farmers in the field of organic sustainable agriculture

We offer:

- An activity within the framework of state development cooperation
- Comprehensive social benefits
- Professional support and care
- Linguistic and intercultural preparation
